RE: Docket No. 25-08-04, Annual Review of Statewide Shared Clean Energy Facility Program Requirements - Year 7

Dear Mr. Rudiak,

Pursuant to the Public Utilities Regulatory Authority's (PURA) Final Decision in Docket No. 21-08-04 the Department of Energy and Environmental Protection (DEEP) submits this narrative to the Electric Distribution Companies (EDCs) regarding the Year 7 solicitation for the Shared Clean Energy Facility Program (SCEF).[1]

DEEP received Appendix B submittals for 25 Bids in the Year 7 SCEF solicitation, four of which were in United Illuminating (UI) territory:

- East Haven Solar One, 1,500 kW
- Maple Solar, 3,000 kW
- Derby Solar, 4,990 kW
- Ansonia Solar, 1,000 kW

DEEP received communication from UI that they disqualified Derby Solar and Maple Solar.

DEEP determined that the remaining two Bids in UI territory sufficiently completed Appendix B in accordance with the SCEF Program Manual and, therefore, were recommended by DEEP to move forward in the EDC's selection process:

- East Haven Solar One, 1,500 kW
- Ansonia Solar, 1,000 kW

None of the projects applied for or qualified for any Bid Preferences.

Based on DEEP's Appendix B evaluation, DEEP recommends that
UI pass the two Bids described above for the purpose of DEEP's review of Appendix B.

[1] PURA, Final Decision, Docket No. 21-08-04, Annual Review of Statewide Shared Clean Energy Facility Program Requirements – Year 3 at 16 (Nov. 17, 2021).

Sincerely,

___/s/ Lauren R. Savidge_____
