Date Filed: May 28, 2026

Witness: Rice, Brian J
Request from: Public Utilities Regulatory Authority

Question:

Motion No. 26, Docket No. 25-08-02, pp. 10. Provide an estimate of the annual lost EDC revenue if the RECs associated with DC-coupled solar and storage systems are no longer sold into the market.

Response:

Eversource's PowerClerk portal did not collect data on whether a storage system was AC-coupled or DC-coupled consistently until 2024. As such, the estimate includes estimated production from projects that have received PTO and that specified DC-coupled storage in PowerClerk, multiplied by the average dollar per Eversource REC sales for 2025 CT Class 1 RECs.

The estimated annual lost EDC revenue if RECs associated with DC-coupled solar and storage systems are no longer sold into the market is $170,919.05.
