Line No.	Field Work Order	Field Work Order Description	O&M Amount	NON BILLABLE REASON	POWER SURVEY ATTACHMENT COMMENTS
				Make Ready - Correct pre-existing condition/violation - Loading	Inst. (1) 14M non-ins. span guy at 6" above Sec. DE, run to pole 2204 (attach at 17' from ground at pole 2204).
				Pole replacement - Pole Clearance (pre-existing condition/violation)	FTR set 45' class 2 pole / Remove 35' class 4 pole. Attach DDE Sec./Neut. at 109". Inst. (1) 14M non-ins. anc. guy at 103", attach to the DE anc. (FTR set). Install 25kVA xfrmr, replace obsolete style 25kVA
				Make Ready - Correct pre-existing condition/violation - Loading	xfrmr. Transfer cutouts. Note: Pole replaced due to pre-existing clearance violations.
				Make Ready - Correct pre-existing condition/violation - Loading	Raise Sec. DE 12". Inst. (1) 14M non-ins. span guy opposite raised Sec. DE, run to pole 2221 (attach at 17' above ground at pole 2221).
				Pole replacement - Pole defective (pre-existing condition/violation)	Inst. (1) 14M non-ins. span guy at 6" above Neut. DE, run to pole 2229 (attach at 6" above Neut. DE at pole 2226).
				Make Ready - Correct pre-existing condition/violation - Loading	Replace twisted/defective x-arm. Inst. (1) 14M non-ins. span guy opposite Neut. DE, run to pole 2224 (attach at 17' from ground at pole 2224). Transfer cutouts to new x-arm pole top.
				Make Ready - Correct pre-existing condition/violation - Loading	Raise Neut. 6". Inst. (1) 14M non-ins. span guy opposite raised Neut. DE, run to pole 2198 (attach at 6" above Sec. DE at pole 2199).
				Make Ready - Correct pre-existing condition/violation - Clearance	Inst. (1) 14M non-ins. span guy at 6" above Neut. DE, run to pole 2194 (attach at 18' from ground at pole 2195).
				Make Ready - Correct pre-existing condition/violation - Clearance	Extend svc. riser up to Sec. level. Clean up drooping xfrmr/svc riser cables.
				Pole replacement - Pole Clearance (pre-existing condition/violation)	Raise Sec.s 12". Pull slack in Sec. to pole 2185.
				Pole replacement - Pole Clearance (pre-existing condition/violation)	FTR set 45' class 2 pole / Remove 40' class 4 pole. Attach Sec. DE at 109". Inst. (1) 14M non-ins. span guy at 109", run to pole 2182 (attach at existing location at pole 2182) Install 25kVA xfrmr, replace
				Pole replacement - Pole defective (pre-existing condition/violation)	obsolete style 25kVA xfrmr. Transfer streetlight & cutouts. Note: Pole replaced due to pre-existing clearance violations.
				Pole Replacement - triggered by Make Ready at adjacent pole = 5ft rule, ect.	Existing Attachment auto-added.
				Make Ready - Correct pre-existing condition/violation - Loading	Existing Attachment auto-added.
				Make Ready - Correct pre-existing condition/violation - Clearance	Existing Attachment auto-added.
				Make Ready - Correct pre-existing condition/violation - Clearance	Raise Neut. DE 12". Raise DPX Sec. DE 14". Inst. (1) 14M non-ins. span guy opposite raised Neut. DE, run to pole 227.
				Make Ready - Correct pre-existing condition/violation - Clearance	Raise DPX Sec. DE 17".
				Pole replacement - Pole Clearance (pre-existing condition/violation)	Raise Sec./Neut./Svc 14".
				Make Ready - Correct pre-existing condition/violation - Loading	Raise Neut. 18".
				Make Ready - Correct pre-existing condition/violation - Clearance	FTR set 45' class 2 pole / Remove 35' class 4 pole. Attach Sec. at 109", adjust midspan Sec. tap.. Install cutouts. Transfer xfrmr. Note: Pole replaced due to pre-existing clearance violations.
				Make Ready - Correct pre-existing condition/violation - Clearance	Inst. (1) 14M non-ins. span guy opposite existing span guy in Sec. gain, run to pole 2210 (attach opposite Sec. DE at pole 2210).
				Make Ready - Correct pre-existing condition/violation - Clearance	Raise Sec. 8" & pull slack in Sec. DE to pole 2261.
				Make Ready - Correct pre-existing condition/violation - Clearance	Extend svc. riser up to Sec. level.
				Make Ready - Correct pre-existing condition/violation - Clearance	Raise all Sec.s & Svc 12".
				Make Ready - Correct pre-existing condition/violation - Loading	Raise Sec. 14". Extend regulator control riser up to raised Sec. level.
				Pole Replacement - triggered by Make Ready at adjacent pole = 5ft rule, ect.	Raise Neut. 6".
				Make Ready - Correct pre-existing condition/violation - Loading	Inst. (1) 14M non-ins. span guy at 6" above Neut. DE, run to pole 333 (attach at 17' above ground at pole 333).
3905	80391464	BC - Conv. 1828668 - Make Ready Non	1,944	Make Ready - Correct pre-existing condition/violation - Clearance	FTR set 45' class 2 pole / Remove 35' class 4 pole. Attach Sec. bracket at 109" (Claim electric space). Note: Pole replaced due to defective, large deep hole near Sec. gain.
				Make Ready - Correct pre-existing condition/violation - Loading	Inst. (1) 14M non-ins. span guy at 6" above Sec. DE, run to pole 2204 (attach at 17' from ground at pole 2204).
				Pole replacement - Pole Clearance (pre-existing condition/violation)	FTR set 45' class 2 pole / Remove 35' class 4 pole. Attach DDE Sec./Neut. at 109". Inst. (1) 14M non-ins. anc. guy at 103", attach to the DE anc. (FTR set). Install 25kVA xfrmr, replace obsolete style 25kVA
				Make Ready - Correct pre-existing condition/violation - Loading	xfrmr. Transfer cutouts. Note: Pole replaced due to pre-existing clearance violations.
				Make Ready - Correct pre-existing condition/violation - Loading	Raise Sec. DE 12". Inst. (1) 14M non-ins. span guy opposite raised Sec. DE, run to pole 2221 (attach at 17' above ground at pole 2221).
				Pole replacement - Pole defective (pre-existing condition/violation)	Inst. (1) 14M non-ins. span guy at 6" above Neut. DE, run to pole 2229 (attach at 6" above Neut. DE at pole 2226).
				Make Ready - Correct pre-existing condition/violation - Loading	Replace twisted/defective x-arm. Inst. (1) 14M non-ins. span guy opposite Neut. DE, run to pole 2224 (attach at 17' from ground at pole 2224). Transfer cutouts to new x-arm pole top.
				Make Ready - Correct pre-existing condition/violation - Loading	Raise Neut. 6". Inst. (1) 14M non-ins. span guy opposite raised Neut. DE, run to pole 2198 (attach at 6" above Sec. DE at pole 2199).
				Make Ready - Correct pre-existing condition/violation - Clearance	Inst. (1) 14M non-ins. span guy at 6" above Neut. DE, run to pole 2194 (attach at 18' from ground at pole 2195).
				Make Ready - Correct pre-existing condition/violation - Clearance	Extend svc. riser up to Sec. level. Clean up drooping xfrmr/svc riser cables.
				Pole replacement - Pole Clearance (pre-existing condition/violation)	Raise Sec.s 12". Pull slack in Sec. to pole 2185.
				Pole replacement - Pole Clearance (pre-existing condition/violation)	FTR set 45' class 2 pole / Remove 40' class 4 pole. Attach Sec. DE at 109". Inst. (1) 14M non-ins. span guy at 109", run to pole 2182 (attach at existing location at pole 2182) Install 25kVA xfrmr, replace
				Pole replacement - Pole defective (pre-existing condition/violation)	obsolete style 25kVA xfrmr. Transfer streetlight & cutouts. Note: Pole replaced due to pre-existing clearance violations.

					Clean up drooping Sec./Svc cables.
					FTR to set 45' class 1 pole (E5) / Rmv. 40' class 3. Attach 1PH tap at 36". Attach Sec./Neut. tap at 104". Attach top AC at 120". Attach bottom AC at 136". Inst. (1) 14M ins. anc. guy at 22", attach to the bisector anc. (FTR Set). Inst. (1) 14M non-ins. anc. guy at 136", attach to the bisector anc. (FTR Set). Transfer cutout, spare fuse holder & streetlight. Note: Pole replaced at phones request, due to clearances to ground level.
					Clean up drooping Xfrmr./Sec./Svc. cables. Install zap shield.
					Clean up drooping Xfrmr./Sec./Svc. cables. Install zap shield.
					Raise Sec. DE (x2) 57". Dress Svc riser cable due to Sec. raise.
					Raise Sec. 35", bring Sec. tap up to new raised Sec. bolt height. Pull slack in Sec. to pole 2169 (adjust midspan Svc). Inst. (1) 18M ins. anc. guy at 16" below 1PH tap, replacing existing guy, attach to the existing DE anc..
					Pull slack in Sec. to pole 8724 & 8726. Clean up drooping Xfrmr./Sec. cables. Install cutout & zap shield.
					Pull slack in Sec. to pole 8730.
					Pull slack in DE Sec. to pole 8734. Clean up drooping Xfrmr./Svc. cables. Install cutout & zap shield.
					Pull slack in DE Sec. to pole 8737, replace hardware. Clean up drooping Xfrmr/Svc. cables. Install cutout & zap shield.
					FTR to set 40' class 2 pole (JO) / Rmv. 35' class 4. Attach Sec. at 82". Inst. (1) 14M non-ins. anc. guy at 82", attach to the DE anc. (FTR set). Note: Pole replaced at phones request, due to clearances to ground level.
					Pull slack in Sec. to pole 20050 (adjust midspan Svcs).
					Pull slack in Neut. to pole 20607. Clean up drooping Xfrmr./Sec. cables. Install zap shield.
					Pull slack in DE Sec. to pole 9290, replace Sec. hardware (adjust midspan service).
					Pull slack in Sec. DE to pole 24603. Pull slack in Sec. DE to pole 25918.

Pull slack in Sec. to pole 2466, adjust midspan Sec. tap to pole 13910. Install zap shield.
					Raise Sec. tangent 6" & pull slack in Sec. to pole 30222. Raise Sec. DE tap to raised up Sec. bolt/bracket (17"). Raise top aerial cable to 16" below raised Sec. (15"). Raise bottom aerial cable to 16" below raised top aerial cable (15"). Extend Svc. riser conduit up to top raised aerial cable bracket.
					Extend Svc. riser cable length up to Sec. level, extend conduit cover up to top aerial cable bracket.
					Raise Sec. DE 6", splice 1/0 TPX Neut. to 1/0 Neut. DE (new bracket at 12" below bottom bolt of recloser). Raise top aerial cable to 16" below raised Sec. (12"). Raise bottom aerial cable to 16" below raised top aerial cable (14"). Extend recloser control riser conduit up to top raised aerial cable bracket.
					Pull slack in Sec. to pole 6072 and in DE Sec. to pole 10831. Clean up drooping Sec. cables. Install zap shield.
					Extend Svc. riser up to Sec. Clean up drooping Svc. riser cables.
					Extend Svc. riser cable length & riser cover up to Sec. level.
					Pull slack in Sec. to pole 10832. Pull slack in Sec. to pole 10832. Clean up drooping Sec./Svc. riser cables. Install zap shield.
					Pull slack in Sec. to pole 6069 & 6067 and in DE Sec. to pole 10693.
					Extend Svc. riser up to Sec.. Clean up drooping Svc. riser cables.
					Pull slack in DE Sec to pole 12363 (adjust midspan service). Install zap shield.
					Raise Sec. 12". Raise top aerial cable to 16" below raised Sec. (12"). Raise bottom aerial cable to 16" below raised top aerial cable (12"). Extend Svc. riser cable length & riser cover, up to raised Sec. level. Install zap shield.

				Pole replacement - Pole defective (pre-existing condition/violation)	Shift ES facilities to FTR set 40/2, Remove: 35/4 Due to rotten pole base; Attach secondary span guy from P.187 installed on Station 06; Attach sec 82" from pole top
				Pole replacement - Pole defective (pre-existing condition/violation)	Shift ES facilities to FTR set 45/2, Remove: 40/3 Due to rotten pole base; Replace primary span guy to P.866, sec span guys to P.186 and P.253; Attach sec 136" from pole top, SVC midspan
				Pole replacement - Pole defective (pre-existing condition/violation)	Shift ES facilities to FTR set 40/2, Remove: 35/4 Due to rotten pole base; Attach sec 82" from pole top; SVC exists midspan; Install DDE pole top and slack span to P.189, install 14M DG to FTR set anchor, P~DE, LL~8'
				Pole replacement - Pole defective (pre-existing condition/violation)	
				Pole replacement - Pole defective (pre-existing condition/violation)	Shift ES facilities to FTR set 40/2, Remove: 40/4 Due to rotten pole base; Transfer and fuse XFMR, zap shield exists; Attach sec 82" from pole top
				Pole replacement - Pole defective (pre-existing condition/violation)	Shift ES facilities to FTR set 40/2, Remove: 35/4 Due to rotten pole base; Transfer and fuse XFMR (zap shield exists); Attach secondary 82" from pole top
				Make Ready - Correct pre-existing condition/violation - Clearance	Eversource set double pole exists in field; All facilities have transferred except for secondaries and streetlight; Transfer remaining facilities; New pole appears to be 50/45 split due to road clearances; Attach secondaries 163", 147" and 131" from pole top
				Other - Provide Comment	
				Pole replacement - Pole defective (pre-existing condition/violation)	Shift ES facilities to FTR set 40/2, Remove: 35/3 Double pole exists in field, new pole already set; Install 18M DG to FTR set 1" TT anchor, LL~13', P~20'; Attach sec 82" from pole top, SVC exists midspan
				Pole replacement - Pole defective (pre-existing condition/violation)	Shift ES facilities to FTR set 40/2, Remove: 40/3 Due to rotten pole base; Attach area light secondary DE 30" from pole top to maintain road clearances
				Pole replacement - Pole Loading (pre-existing condition/violation)	Shift ES facilities to FTR set 35/2, Remove: 35/4 Due to rotten pole base; Attach tangent secondary QPX SVCs 28" and 12" from pole top
				Pole replacement - Pole Clearance (pre-existing condition/violation)	Shift ES facilities to FTR set 40/1, Remove: 40/4 Due to loading; Transfer and fuse XFMR, zap shield exists; Attach sec 82" from pole top, attach SVC midspan
				Make Ready - Correct pre-existing condition/violation - Loading	Due to loading: ES install additional 1" TT anchor and 18M DG, LL~10', P~DE
				Make Ready - Correct pre-existing condition/violation - Loading	Replace broken 18M primary span guy to P.3393
				Make Ready - Correct pre-existing condition/violation - Loading	Replace stub guys to P.2198S
				Pole replacement - Pole Clearance (pre-existing condition/violation)	Due to loading, install (2) 18M primary DGs to ES set anchor, LL~7', P~10'; FTR to replace broken stub guy
				Make Ready - Correct pre-existing condition/violation - Loading	Replace rusty 18M primary DG to existing anchor, LL~13', P~DE
				Make Ready - Correct pre-existing condition/violation - Loading	Shift ES facilities to FTR set 40/2, Remove: 35/4 Due to rotten pole base; Transfer and fuse XFMR, install zap shield; Attach sec 82" from pole top
				Pole replacement - Pole Clearance (pre-existing condition/violation)	Due to loading, ES install 1" TT anchor and 14M DG backing DE secondary span guy, LL~11', P~DE
				Pole replacement - Pole defective (pre-existing condition/violation)	Due to rotted pole top at FO stub pole in backyard, replace stub guy w/ 18M sidewalk guy, P~15', LL~7'
				Make Ready - Correct pre-existing condition/violation - Loading	Shift ES facilities to FTR set 35/2, Remove: 30/5 Due to rotten pole base; Replace primary span guy to P.184; Install 14M DG to FTR set 1" TT anchor, LL~10', P~DE; Attach sec 52" from pole top
				Make Ready - Correct pre-existing condition/violation - Loading	Shift ES facilities to FTR set 35/2, Remove: 35/2 Due to rotten pole base; Attach span guy from P.424 (replaced on WO 23417736, Station 02); Attach secondary 52" from pole top
				Pole replacement - Pole defective (pre-existing condition/violation)	Shift ES facilities to FTR set 35/1, Remove: 35/4 Replace due to loading (unbacked primary span guy, no viable option for anchor due to driveways); Primary span guy replaced on Station 02, P.428; Attach sec 52" from pole top
				Pole replacement - Pole Loading (pre-existing condition/violation)	
				Pole replacement - Pole defective (pre-existing condition/violation)	Shift ES facilities to FTR set 35/2, Remove: 30/4 Due to rotten pole base; Attach secondary 52" from pole top
				Pole replacement - Pole defective (pre-existing condition/violation)	Shift ES facilities to FTR set 35/1, Remove: 35/4 Due to rotten pole base; Class 1 due to loading and no location to anchor; Replace primary span guy to P.673; Attach secondary at pole top to maintain clearances
				Pole replacement - Pole defective (pre-existing condition/violation)	Deadend new 1/0 TPX (150') to P.279, maintain secondary break; Attach 112" from pole top (opposite existing 1/0 TPX DE)
