LFE-015

GenConn Energy LLC **Witness: Devang Patel**
Brandon Shatraw

Docket No. 26-06-02 **Page 1 of 1**

Date Submitted: October 19, 2026

LFE-015 Q:

Provide a narrative explaining how the Company determined the estimated cost of $500,000 for the Woodward Control Server/Mark VI. (Requested of GenConn)

LFE-015 A:

As indicated in Attachment GenConn-01, the Company has begun the process to interact with GE and related parties for both the Woodward Control Server and the GE Mark VI (hardware, software, licensing, installation service, support, etc.). While the process will result in formal quotations and schedule for implementation the Company has not yet received that information. The estimated costs of $500,000 per system are based on verbal and indicative pricing only. The presentation within GenConn's filing is based on the best available information available and based on the operators experience managing a portfolio of projects and long-standing working relationship with GE.

As the Company has indicated at the evidentiary hearing held on October 5, 2026 there are no costs included for these projects in its request for 2027 revenue requirements. The Company will provide all details as necessary to support prudency review following implementation and when these plants addition are placed into service.
