CAE-021

The United Illuminating Company **Witness: Logan Taricani**

Docket No. 26-08-05 **Page 1 of 1**

Date Submitted: August 28, 2026

CAE-021 Q:

Program Administrator Order No. 3 Compliance, Aug. 3, 2026, Att. 2, p. 18.

Explain whether the identification of unresolved data quality issues affecting 4% of telemetry data impacted the accuracy of performance incentive payments or the applicability of upfront incentive clawbacks.

CAE-021 A:

Following discussions UI held with both Customized Energy Solutions ("CES") and Uplight, UI's ESS DERMS provider, UI is confident that the approximate 4% of telemetry data excluded from CES's annual report analysis did not result in incorrect performance incentive payments to participating customers. CES's review was performed for purposes of evaluating overall program performance and data quality trends and was primarily focused on identifying anomalies within the energy (kWh) data used for broader program analyses. By contrast, customer performance incentive payments are based on measured dispatch performance during event periods and rely principally on demand reduction and battery output data expressed in kW.
