Connecticut Green Bank
Docket No. 26-08-05
Response to Interrogatory CAE-5
Date of Submission: July 9th, 2026
Witness: Connecticut Green Bank - Sergio Carrillo

Question:

CAE-5 Decision, Nov. 29, 2023, Annual Energy Storage Solutions Program Review – Year 3, (Year 3 Decision), p. 21.

a. For calendar year 2025, provide the number and percentage of ESS projects enrolling during that year that completed CGB inspections, disaggregated by commercial and residential projects.

b. Confirm whether these projects affirmatively opted into the inspection process, as required by the Year 3 Decision, rather than being automatically assigned to a CGB inspector.

c. Provide the total cost of all CGB inspections conducted in calendar year 2025.

Response:

During calendar year 2025, a total of 28 Energy Storage Solutions (ESS) projects were inspected, and each of those projects had the inspection checkbox marked in the incentive application portal. All 28 inspected projects were residential systems as no Commercial and Industrial (C&I) systems were inspected during this period. In calendar year 2025, approximately 323 ESS projects advanced to completed status including 1 C&I project. Accordingly, just under 9% of completed ESS projects were inspected.

Metric	2025 Projects
Number of CGB inspections completed	28
Number of ESS projects completed	323
Percentage of completed projects inspected	9%
Total inspection cost	$9,657.40

During monthly ESS Eligible Contractor trainings, participating contractors are instructed that the inspection checkbox should only be selected after confirming the host customer's interest in receiving an inspection. The Green Bank understands that, when the inspection checkbox is selected, the host customer has either indicated to the contractor or third-party owner (TPO) that they are requesting an inspection. If it was mistakenly selected, the customer will otherwise notify the Green Bank if they do not wish to proceed after the inspection communication is issued following submission of completion paperwork by the contractor or TPO.

Connecticut Green Bank
Docket No. 26-08-05
Response to Interrogatory CAE-5
Date of Submission: July 9th, 2026
Witness: Connecticut Green Bank - Sergio Carrillo

The total cost of ESS inspections performed by the Green Bank during calendar year 2025 was $9,657.40, representing the cost associated with 28 residential inspections.
