RSR-002

GenConn Energy LLC **Witness: Devang Patel**
Brandon Shatraw

Docket No. 26-06-02 **Page 1 of 1**

Date Submitted: August 19, 2026

RSR-002 Q:

(Expenses) Application, Ex. GenConn-01, p. 46 and Ex. GenConn-EP2. Regarding the Stack Testing project (Expense Item #2), provide:

a. Which FERC accounts in Ex. GennConn-02, Ex. 5, Sch, C-3.0d and Ex. 6, Sch. C-3.0m include the 2025 actual expenses.
b. An explanation whether the federal EPA and CT DEEP testing and permitting requirements are new requirements, including the time the requirements were first implemented and whether any changes to the requirements were in place for calendar year 2025.
c. A description of how the vendors were selected for the testing and whether the Company's requirements for a competitive process were followed in selecting the vendors.
d. Copies of all bids received from vendors and considered for this project.

RSR-002 A:

a. FERC Account 553 includes the 2025 actual expenses noted above.

b. The requirements are not new this year. Annual YYYY testing commenced in 2023 (Middletown only). Additionally in 2025, Devon NOx RACT and NOx Correlation testing was completed on a 5-year cycle, applicable to both facilities. There are no changes to requirements.

c. For these tests, specialized stack testing equipment is very limited in availability. Support vendors book testing long in advance, group their schedules regionally, and yet remain highly responsive to established clients. GenConn has maintained multiple strong relationships yet inevitably weighs availability when selecting final award. Not least of all, when performing environmental testing of this type, the Company's strong preference is to use the same contractor with the same equipment that is calibrated to assure consistency in testing and provide accurate trending of emissions characteristics over time. The vendor selected initially would continue to be retained over the necessary time periods to satisfy this requirement, to the extent possible.

d. Refer to RSR-002 Attachment 1 CONFIDENTIAL.
