Date Filed: October 28, 2026

Witness: Rice, Brian J
Request from: Public Utilities Regulatory Authority

Question:

Eversource Comments, Aug. 26, 2026, Att. 1. Explain how Eversource selected the $0.50 per kW example payment rate used in the MPF revenue model.

Response:

$0.50 was selected as a purely illustrative value to demonstrate how material additional revenue would be generated under a MPF design to potentially support investment in paired energy storage.
