Date Filed: October 28, 2026

Witness: Rice, Brian J
Request from: Public Utilities Regulatory Authority

Question:

Under Eversource's MPF proposal, clarify the term for which eligible projects would receive per-kW payments (e.g., for the full tariff term or another time period), and whether the per-kW payment level would be fixed for a given project over the duration of the term. Discuss the reasons for these recommendations.

Response:

Eversource anticipates that successor program agreements would provide a fixed per-kW payment rate for the full tariff term, but welcomes alternative proposals from stakeholders and prospective program participants.
