Re: Docket No. 26-08-02, Annual Residential Renewable Energy Tariff Program Review and Rate Setting – Year 6, Compliance with Order No. 13 of the Final Decision in Docket No. 25-08-02

Dear Mr. Gaudiosi,

The United Illuminating Company ("UI" or the "Company") hereby submits the following information to the Public Utilities Regulatory Authority ("PURA") as compliance with Order No. 13 of the Final Decision in Docket 25-08-02 ("Decision") dated December 17, 2025.

Order No. 13 of the Decision states:

> *Reference Year 2 Decision, Order No. 17, p. 36: No later than May 1, 2023, and quarterly thereafter for the remainder of the RRES Program, the EDCs shall submit information for the prior quarter (e.g., January 1, 2023 through March 31, 2023 for the May 1, 2023 filing) on the following items related to RRES Program applications: (1) the length of time from application to submission to tariff review approval; (2) the length of time from tariff review approval to interconnection contingent approval; (3) the length of time to receive the work order number needed to apply for permits from cities and towns; (4) the length of time to process payments when applicable; (5) the length of time for any applicable witness tests; (6) the number of days between when the utility is notified of a completed inspection to meter installation; and, [(7)] the length of time for final issuance of the permission to operate. The RRES APWG may recommend additions to this list in their final report filed on December 14, 2022. Such filings shall be submitted in the relevant RRES Program review docket (e.g., any updates related to Year 2 of the RRES Program shall be disclosed in this proceeding, Docket No. 22-08-02).*

In response to those directives, UI provides Table 1 (below), showing quarterly applications data for Residential Renewable Energy Solutions Program from July 1, 2026 through September 30, 2026. To deliver the most up-to-date and valid information, all data contained therein is based on energization application information available at the time of data retrieval. Using energized application ensures all milestone dates are available, which eliminates incomplete projects from skewing the data and identifies projects reaching the relevant milestones or Permission to Operate

status during the reporting period. This helps ensure that quarterly averages reported under Order No. 13 are based on complete, chronologically valid, energized application data. Quarterly reports may occasionally present slight deviations from previous reports.

Request #	Regulatory Request	Average Number of Business Days
1	*The length of time from application submission to tariff review approval*	**14.8**
2	*The length of time from tariff review approval to interconnection contingent approval*	**20.5**
3	*The length of time to receive the work order number needed to apply for permits from cities and towns*	**4.1**
4	*The length of time to process payments when applicable*	**42.0**
5	*The length of time for any applicable witness tests*	**10.9**
6	*The number of days between when the utility is notified of a completed inspection to meter installation*	**7.7**
7	*The length of time for final issuance of the permission to operate*	**105.9**

Table 1: Residential Renewable Energy Solutions Milestones - July 1, 2026 through September 30, 2026

I hereby certify service of this filing upon all parties and intervenors of record in this proceeding.

Very truly yours,

James Nitz
