Date Filed: August 17, 2026

Witness: Rice, Brian J, Danahy, Julia G
Request from: Public Utilities Regulatory Authority

Question:

Eversource Comments, May 28, 2026, pp. 7-8; UI Comments, May 28, 2026, pp. 4-5. The EDCS note that the RRES Program requires that the eligible solar PV system be located on the eligible property; however, the EDCs also suggest that PURA consider additional siting requirements to focus MFAH eligibility to systems located on or at the property they serve. Clarify whether MFAH systems have been approved or deployed that are not located on the eligible property.

Response:

No Multi-Family Affordable Housing ("MFAH") projects have been approved or deployed within the Residential Renewable Energy Solutions ("RRES") program that are not located on the eligible property as determined by its parcel boundaries.
