Date Filed: August 17, 2026

Witness: Rice, Brian J, Danahy, Julia G
Request from: Public Utilities Regulatory Authority

Question:

Id. Comment on the administrative feasibility, including cost and timeline, to implement differentiated Buy-All compensation rates for 1 to 4-unit properties and MFAH properties

Response:

Eversource can implement differentiated Buy-All compensation rates for 1 to 4-unit properties and MFAH properties at no additional cost and with a minimal implementation timeline. The Eversource billing system can accommodate various Buy-All compensation rates currently. The PowerClerk application portal would require minimal updates to assign differentiated rates during the application process, but this is within the scope of general portal management.
