The United Illuminating Company

Witness: Maritza Estremera Jimenez
Bruno Fernandes

Docket No. 26-08-08

Date Submitted: April 2, 2026

PMUI-003 Q:
In the expanded Annual Filing, please indicate if projects filed in the prior Process Cycle have been installed, cancelled, have had changes in scope of the grid need or the expected price of the wires or non-wires solution or if they have moved to more advanced funding stages.

PMUI-003 A:

All projects reported in the Grid Needs Filing have already been rigorously evaluated for NWS and vetted to a level of maturity such that the selected solution is unlikely to change. Any subsequent revisions would likely be limited to design refinements within the approved solution, rather than a change in the selected solution or a shift to a different alternative. UI confirms that all projects included in the previous Grid Needs Filing remain unchanged, with any noted modifications limited solely to project design elements. Please refer to the original Grid Needs Filing for the installation timeframe or in-service dates.
