Eversource – Isabelle Hazlewood – Program Manager, Solar Programs
The United Illuminating Company – Katerina Miller – Manager, Electric Supply
The United Illuminating Company – John King - Analyst, Wholesale Power
The United Illuminating Company – Alexandra Torrealba - Customer Programs & Products Manager

Discussion Topics

1. SCEF Year 8 Procurement Price Caps
2. SCEF Year 8 Procurement Budgets
3. SCEF Year 8 Bid Preferences
4. SCEF Year 8 Proposed Programmatic Changes

SCEF Year 8 Procurement Price Caps

- The EDCs support DEEP's recommendation
  - Maximum selected purchase price for the same resources in the prior year's RFP
    - $182.93/MWh
  - Higher than proposed NRES Large Zero buy-all Price Cap
  - Adjustment by the Authority where necessary for changing conditions
- One Price Cap for all project types
  - Continue to allow Carport/Canopy Projects to Bid above standard Price Cap
- Eversource significantly oversubscribed
  - $13 million to award/$23 million received in Bids
- UI undersubscribed

Procurement Budgets

- Maintain existing EDC-specific budget allocations
- Current allocations reflect estimated compensation obligations from prior procurements
  - $9.86 Million for Eversource
  - $5.71 Million for UI
- 80/20 reallocation would increase Eversource's allocation by approximately $2.6 million
  - Contrary to established methodology to control costs

SCEF Year 8 Bid Preferences

- The Companies recommend maintaining Bid Preference categories and amounts established in PURA's Year 7, Final Decision in Docket No. 25-08-04.
  - 40% Bid Preference – Solar Canopy Projects
  - 20% Bid Preference – Landfill/Brownfield Projects
  - Maintain existing categories and Bid Preference levels
  - Existing Bid Preferences have demonstrated meaningful participation without evidence that an increase is necessary

SCEF Year 8 Proposed Programmatic Changes

- Given the maturity of the SCEF Program and its final Program year, the EDCs recommend maintaining the existing Program framework.
  - Submitted redlines included only updates for consistency and elimination of ambiguity
- Any changes should be limited to discrete clarifications that improve consistency and eliminate uncertainty
