The United Illuminating Company

Witness: Maritza Estremera Jimenez
Bruno Fernandes

Docket No. 26-08-08

Date Submitted: April 2, 2026

PMUI-006 Q:

Are there any factors that may cause you to reevaluate projects that had been previously identified as "Likely NWS Opportunities" but did not proceed to an NWS RFP? If so, what are these factors and what would cause them to trigger a re-evaluation (i.e. change in cost of the wired option, change in forecast over the distribution circuit, reduction in costs of specific NWS solutions, etc.).

PMUI-006 A:
Please refer to responses PMUI-003 and PMUI-005. Consequently, there are no opportunities for projects previously reported in the Grid Needs Filing to change their categorization to "Likely NWS Opportunity" which would require an NWS RFP.
