Re: Docket No. 25-08-05, Annual Energy Storage Solutions Program Review – Year 5 Compliance with Order No. 14 of the Final Decision in Docket No. 25-08-05

Docket No. 26-08-05, Annual Energy Storage Solutions Program Review – Year 6 Compliance with Order No. 14 of the Final Decision in Docket No. 25-08-05

Dear Mr. Gaudiosi:

The Connecticut Green Bank ("Green Bank"), The Connecticut Light and Power Company d/b/a Eversource Energy ("Eversource"), and The United Illuminating Company ("UI"; together with Green Bank and Eversource, the "PAs") respectfully submit to the Public Utilities Regulatory Authority ("PURA" or the "Authority") their compliance with Order No. 14 of the Final Decision issued in Docket No. 25-08-05 on December 17, 2025 (the "Year 5 Final Decision").

Specifically, Order No. 14 of the Year 5 Final Decision states:

> *Reference Decision, Nov. 29, 2023, Docket No. 23-08-05, Order No. 25, p. 62: No later than August 1, 2024, and annually thereafter until the ESS Program stops accepting new enrollments, the Program Administrators shall file as compliance in the applicable annual review proceeding (i.e., in 2024, Docket No. 24-08-05) a summary of the Performance Incentive Fees for all residential projects deployed through the end of the previous month (e.g., through July 2024 for the August 1, 2024 filing) by developer, following all direction contained in Section IV.G.*

Prior to the summer of 2024, no Original Equipment Manufacturers ("OEMs") in the Program were taking a portion of the customer's performance incentives. When Tesla joined the Program in Fall of 2024, they announced that they would take 20% of their customers' Active Performance Incentives.

In February of 2025, Franklin announced they will take 10% of all new customers' Active Performance Incentives and set a date of April 7, 2025, as a start date. For Eversource, this means that customers whose "applied date" in the EnergyHub platform is before April 7, 2025, will not

be subject to the 10% fee. For UI, this means that customers whose "Registration Date" ("reg_date") in the Uplight platform is before April 7, 2025, will not be subject to the 10% fee.

Table 1 below represents the summer 2025 and winter 2025-2026 season OEM Fee and customer totals impacted by the OEM fees.

Table 1: Summary of Performance Incentive Fees during Summer 2025 & Winter 2025-2026

	Summer 2025		**Winter 2025-2026**	
OEM	*Customer Count*	*Total Cost*	*Customer Count*	*Total Cost*
FranklinWH	88	$ 11,893.18	192	$ 4,848.84
Tesla	121	$ 36,892.83	172	$ 5,938.85

No other developers or OEMs in the Energy Storage Solutions program currently charge a Performance Incentive Fee. All OEM Incentive Performance Fee percentages are also made available on the Energy Storage Solutions website[1] to keep customers informed.

The PAs hereby certify service of this filing upon all parties and interveners of record in this proceeding.

Respectfully submitted,

THE CONNECTICUT LIGHT AND POWER COMPANY D/B/A EVERSOURCE ENERGY
