Date Filed: April 10, 2026

Witness: GLADEY, DAVID L, Freeman, Lavelle A
Request from: Process Monitor

Question:

In the narrative documents (Attachment 16), the same level of detail is not provided for all projects. Please amend the narrative document to include a full description of the evaluated options, similar to what was provided for project #CD02440.

Response:

Please refer to PMEV 010 Attachment 1. In this attachment the Company has included additional details on the projects; however, please note that projects may undergo different levels of engineering design based upon the complexity of the project itself. In other words, a substation or line project that requires multiple years of planning and engineering will provide those planning details within the narrative document, whereas many line projects that are lower cost, with fewer design options, and shorter timelines from need identification to installation will not have a comparable amount of detail available for the narrative document.
