Re: Docket No. 26-08-05, Annual Energy Storage Solutions Program Review – Year 6
Docket No. 25-08-05, Annual Energy Storage Solutions Program Review – Year 5
Compliance with Order No. 24 of the Final Decision in Docket No. 25-08-05

Dear Mr. Gaudiosi:

The Connecticut Green Bank ("Green Bank"), The Connecticut Light and Power Company d/b/a Eversource Energy ("Eversource"), and The United Illuminating Company ("UI"; together with Green Bank and Eversource, the "Program Administrators") respectfully submit to the Public Utilities Regulatory Authority ("PURA" or the "Authority") their compliance with Order No. 24 of the Final Decision issued in Docket No. 25-08-05 on December 17, 2025 (the "Year 5 Final Decision").

Specifically, Order No. 24 of the Year 5 Final Decision states:

> *No later than June 1, 2026, the Program Administrators shall enhance the existing ESS data dashboard to display ESS dispatch event data at the most granular level and with the lowest possible latency available to the Program Administrators. Additionally, by the same date, the updated ESS dashboard must include the Program's dispatch response-to-call ratio, to provide stakeholders with a clear and consistent measure of Program performance. The Program Administrators shall notify the Authority via compliance filing upon fulfillment of this order.*

The Program Administrators submit this compliance filing to notify the Authority that the Energy Storage Solutions ("ESS") data dashboard has been updated on the ESS website's Performance Report page[1]. The Performance Report page will contain a new tab entitled "Dispatch Event Metrics." The new tab displays eight key performance indicator cards with metrics including: overall dispatch to call ratio, Active and Passive dispatch ratios, event counts, total energy dispatched, average and max event power, and average percent energy discharged. The metrics

[1] https://energystoragect.com/ess-performance-report/

can be filtered by a variety of variables including date, electric distribution company, original equipment manufacturer, sector, and other information.

If requested by PURA, the Program Administrators would be happy to present the data dashboard to PURA and stakeholders during the first ESS Technical meeting in the current annual review docket, Docket No. 26-08-05, which PURA has tentatively scheduled for August 7, 2026.

The Program Administrators hereby certify service of this filing upon all parties and interveners of record in this proceeding.

Respectfully submitted,

THE CONNECTICUT LIGHT AND POWER COMPANY D/B/A EVERSOURCE ENERGY
