Re: Docket No. 26-08-09 – Annual Electric Distribution Company Reliability and Resilience Framework Review – **CIEC Motion for Participant Status**

Dear Mr. Gaudiosi:

Pursuant to the Connecticut Gen. Stat. § 16-19pp, the Connecticut Industrial Energy Consumers ("CIEC") submits this Motion to be designated as a participant in the above-referenced proceeding.

CIEC is a coalition of industrial and large commercial end-users that collectively employ tens of thousands of Connecticut workers at numerous locations throughout the State, including in the service territories of The Connecticut Light and Power Company d/b/a Eversource Energy ("Eversource") and The United Illuminating Company ("UI"; collectively the "EDCs"). As large, high-load-factor customers, the safety, reliability, resiliency, and cost of the electric delivery service provided by the EDCs is of significant importance to CIEC members.

The Authority established this proceeding to review the EDCs' "maintenance plans, reliability performance information, and vegetation management practices [to] ensure that the Authority is fully informed as to the manner of operation of the EDCs' reliability and resilience programs."[1] Access to safe, reliable, resilient, and affordable electric delivery service is integral to the operations of CIEC's members, and the interests of CIEC's members – industrial and large commercial end-users – are not otherwise exclusively represented in this proceeding by any other party. Thus, CIEC is requesting participant status in this proceeding.
