WARNING: Email originated outside of PepsiCo.
Mr. Marcelo,

Thank you for sending the additional information. We will include this correspondence with our application to the Public Utilities Regulatory Authority.

I also wanted to clarify that my office represents Cellco Partnership d/b/a Verizon Wireless in its application for a construction plan to the Public Utilities Regulatory Authority. I do not represent the utility pole owners or the utility companies. Any concerns you have regarding the condition of the pole or issues or concerns related to the alleged event you mentioned should be directed to their attention.

Thank you,

Emily

CAUTION: EXTERNAL EMAIL

Hi Emily,

Furthermore to my previous email, to also add to the file, we would like to have this recorded too.

On the date the utility box detached from the pole and burned, and when the electrical service was subsequently restored, a significant power surge occurred. As a direct and proximate result of that surge, our internet modem and modem extenders sustained irreparable damage and became inoperable.

Consequently, we were required to replace the damaged modem and purchase a new set of modem extender. Attached are copies of the purchase receipt(s), which document the replacement costs and the date of purchase.

This incident is not an isolated event but is further evidence of the hazardous condition created by the excessive number of wires, cables, and utility boxes currently attached to this utility pole. The overcrowded and overloaded condition of the pole has already resulted in multiple problems, property damage, and unnecessary safety risks.

We submit this statement as documentation of the damages incurred and as evidence that the current condition of the utility pole presents an ongoing and foreseeable risk to nearby properties and the public. We respectfully request that this condition be promptly investigated, corrected, and remedied to prevent further damage or injury.

Best
M

Emily,

Thank you for confirming receipt.

To ensure you have all the documentation, we would like to add a few additional facts to the file.

Please find attached photos of the burned trees after the equipment fell and caught fire. The firefighters had to wait until the device had completely burned out before they could proceed.

Also attached are photos of the other equipment on the pole, including exposed burned cables and boxes.

You can also already see the contamination of wires and cables already connect to the pole , on top of boxes and other accessories .

We also wanted to reiterate that this was none an isolated episode, during the the time we lived here, this happened several times

Thank you.

Best,
M

Mr. and Ms. Marcelo,

Your objection to the proposed Greenwich CT SC31 facility is noted and will be referenced in our future pole attachment application filing with the Connecticut Public Utilities Regulatory Authority ("PURA"). We will e-mail copy of the application to you upon its submission to PURA.

Once the application is filed, you will be contacted by PURA's office of Education Outreach and Enforcement with instructions on how to participate in the pole attachment application process. At that time, you will be asked to provide the reasons for your objection.

If you have any further questions or concerns, please feel free to contact me.

Thank you,

Emily

CAUTION: **EXTERNAL EMAIL**

Dear Emily C Deans

We received a letter signed by you stating that Cellco/Verizon has identified a pole location near our property for the installation of wireless cell antennas.

Through this email, we would like to notify you and all parties concerned that we object to this project.

We have already experienced several issues with this pole. Most recently, last Tuesday, firefighters had to respond after my wife called 911 because the pole and part of the electrical equipment were on fire. This was not the first incident.
In addition this pole is already carrying a significant amount of equipment.

Additionally, we believe that Radiofrequency (RF) energy is harmful to health and well-being.

Best
Marcelo and Jorgelina Stefani
